

Recommend: Account Setup

To set up an account in Recommend follow these simple steps:

• <u>Scroll</u> to the bottom of the <u>https://recommend.pro/</u> homepage until you see the **Start my free trial** button, which is highlighted in red.

• Enter your email address and click Start my free trial:

• You will be redirected to the sign-up page, where you need to <u>enter</u> your **Name** and **Password**. <u>Password should not be less than 6 characters.</u>

- <u>Click</u> on the Create account button.
- Then, enter the name of your website and its URL.

RECOMMEND		
	Website Information Adding website is a simple two-step process. Firstly, please enter the website information below.	
	On the second step we will guide you through the tracking setup process.	
	Website Name	
	Website Url e.g. http://recommend.pro or https://recommend.pro	
	CONTINUE	

• Click Continue.

• The next page is the tracking setup. <u>Click</u> Invite technical contact - the red button in the top right hand corner to receive technical assistance, or carry out the following:

Tracking setup	INVITE TECHNICAL CONTA	ст

R·

Step 1 Install module.

Step 2 <u>Configure</u> module through the following steps:

Log in to the Magento Admin Panel.

Navigate to the System panel at the top of the screen and click the Configuration option.

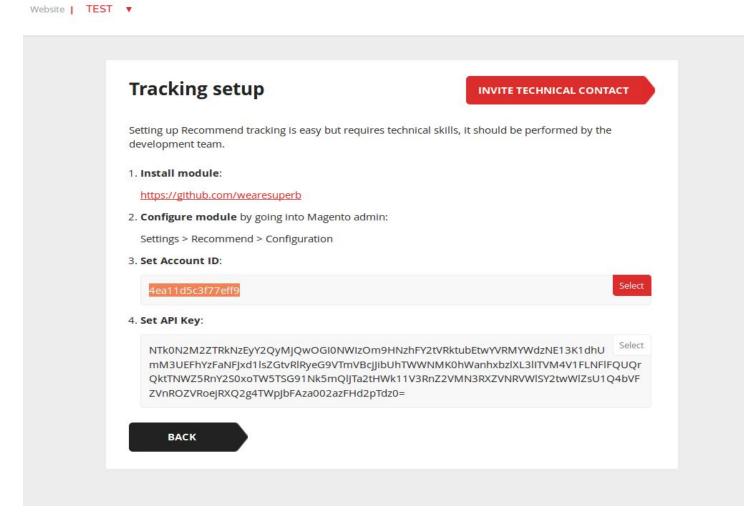

<u>Find</u> Recommend in the left-hand side navigation menu and <u>**click**</u> Recommendations.

	Please make sure the tracking script is installed on th	e homepage of your website.
	BACK	

Should this be the case, **go** to the Magento homepage. When done, you will see the **Building instance** message in Recommend, as illustrated below:

A screen with a dashboard will appear once the database is built, as demonstrated below:

Website TEST V			
0 active customers			V
-	0 Browsing 0 Thinking 0 Buying	 0 New 0 Returning 	 0 Registered 0 Guest
-	0 Desktop 0 Tablet 0 Mobile		
Live overview			v

The dashboard will show accurate information on site user numbers in a matter of minutes. The length of time needed to collect the data to build recommendation blocks, depends on the number of visits, sales, and active products in the Product catalog. It may take between several hours up to several days to collect and process information to build product recommendations. To ensure that all data is correct and accurate, allow for a period of about 2 weeks.*

*Please note that the time periods mentioned are approximate as there might be more factors affecting time periods required to build the Recommend panels in each particular case.
